

## Project Design

### Phase-I Solution

#### Architecture

Date	4 November 2022
Team ID	PNT2022TMID05191
Project Name	Smart waste management system for metropolitan cities
Maximum Marks	4 Marks

#### Solution Architecture:

- Design of the solution gives an intricate procedure with many sub-processes, solution architecture links technical fix to business issue. These are its goals:
- Find best technical solution to solve existing business problems.
- Expand to project stakeholders and enhance the features of the project.
- It specifies the project's features, development stages, and solution.
- Offer the requirements by which the solution is stated to the clients.
